

H305

platform scale

a choice of sizes for a vast range of applications

Avery Weigh-Tronix

a choice of sizes for a vast range of applications

Like all Avery Weigh-Tronix industrial scales, the H305 helps to reduce wastage, cut costs and ensure accurate weight information.

But that's not all. The **H305** is also available in a wide choice of sizes and capacities so you can select a scale that meets the exact requirements of your business.

- **Choice of platform**

This high capacity scale is suitable for a vast range of industrial weighing applications.

The 300 mm x 400 mm platform is available in a capacity of 60 kg, the 400 mm x 600 mm platform can be supplied in 60 kg or 150 kg capacities and the 600 mm x 700 mm platform size is available in 150 kg or 300 kg capacities.

- **Hoseproof model**

Applications with stringent hygiene regulations or a harsh environment can be met by the fully hoseproof **H305**. Manufactured totally from stainless steel, this model is ideal for use in abattoirs, food processing, chemical factories and pilot plants. In fact, any application where the weighing platform must withstand hostile conditions as well as being repeatedly hosed down.

- **Splashproof model**

For weighing applications where hosing down is not essential - such as goods receipt or dispatch, stores or general warehouse duties - then the mild steel splashproof version of the **H305** is the cost effective choice.

- **CENELEC approved**

Where the application poses a risk of explosion and is a classified hazardous zone, the fully hoseproof **H305** is CENELEC approved and may be used with an Avery Weigh-Tronix intrinsically safe indicator in the hazardous area. Alternatively, the mild steel model also has CENELEC approval.

- **Flexible weighing**

The majority of Avery Weigh-Tronix indicators can be used with the **H305**. Many indicators can be fitted to the **H305** as an integral one-piece unit. Where all round access to the weigh plate is required, any indicator can be remotely mounted.

- **Totally reliable**

All **H305** models use Avery Weigh-Tronix's own load cells, ensuring their accuracy and repeatability under constant industrial use. The design of the scale eliminates the need for moving parts and protects the cells from any load that may be accidentally dropped onto the platform.
